# BROADCASTS & LOCKDOWNS

Send Broadcast Messages to users in your organization by selecting the message icon in the top right corner of your screen. Type your message, attach a photo if applicable, select the user types that you would like the message to go to and press send. Lockdown your site by selecting the lock icon in the

top left corner of your screen. Select the organization (if you belong to multiple) and select the groups that you would like the lockdown notification to go to and press send.

End a Lockdown by selecting the red lock icon in the top left corner of your screen and tapping the site and user groups you wish to disengage.

If you have unread broadcast messages, a red badge will appear over your Broadcast Tab. If you are in an active lockdown, a red bar will be visible at the top of your screen and the badge over your Broadcast Tab will include a lock icon.

View your organization's broadcast messages for 90 days. After 90 days, the information will be erased from the Titan HST servers. If you wish to save your broadcast message history, screenshot and save them.

### Titan HST Application

Broadcast Messages can be sent and viewed in this Tab. You can also engage and disengage Lockdowns from the Broadcasts Tab.

Review tutorial of Sending and Receiving Broadcasts. Can be set up by Divisions, Teams or All Members

"All hands meeting in 10-minutes" "Begin five minutes of stretching exercises" "Accident near front gate, use side entrance" "All power is out for at least five hours, do NOT come to work today"; or, better-yet: "Snow Day – WOO HOO!"
